ABOUT MAROUF

If I want to summarize myself in a few words I can use disciplined, eager, and responsible. And in a humble way smart.

My core motivation in the work environment is improving. I have to create value to feel satisfied. Moreover, satisfaction comes from overcoming challenges in a dynamic workspace. I need to feel productive and I feel the necessity of improving. I hate to end a day without learning. I see every day as a chance to learn something new and solve problems. Speaking of my superpower, I can learn anything by myself but I can't deny the importance of having a mentor, who shows me the way and gives me clues to achieve targets easier and better.

EXPERIENCE

Jun2021- 20 October2021
   at Massoud institute Teacher
